ERP Implementation

■ Our SAP Offerings

- Implementation and Upgrades of ERP systems
- New Dimension Applications ([New G/L](#), [GRC](#), [GTS](#), [BI/BW](#), BPC, CRM, Portals)
- Optimizing solutions: R2-decommissioning, Archiving & Data Management
- Business productivity solutions - Business Process Reengineering (BPR)
- Financials, Supply Chain, Logistics, HR and Technical solutions
- Business Intelligence (BI/BW) & Customer Relationship Management (CRM)
- On-site and Off-shore development and system support
- SAP Training & Change Management & Resource Supplementation

Our ERP offerings cover breadth and depth of SAP applications and processes.

SAP-Press Book

Segment Reporting with Document Splitting in the New G/L

by Mitresh Kundalia, Quality Systems & Software

Abstract:

New GL offers many new features including Document splitting to meet 'IAS-14 Segment Reporting' Requirements. With document splitting, the system splits accounting line items according to specific characteristics. This enables you to create financial statements for entities such as Segments. In this comprehensive guidebook on the document splitting, the author describes in detail on how to activate the document splitting automatically to create Segment reporting real-time. The book describes the background details on IFRS-8 requirements, the document splitting concept in the New G/L and step-by-step instructions to configure the New G/L to achieve balanced reporting.

SAP Financials Expertise

Widely acknowledged in the industry as leading SAP Financials experts

■ Publications

- Published over 50 articles & white papers on SAP Financials/Supply Chain subjects in prestigious journals.
- Published a guidebook on “How to perform IAS-14 Segment Reporting in the New G/L”

■ Technical Advisory Board

- Principals serve as strategic, technical advisors and resident editors

■ Conferences

- Invited to speak at more than 30 reputed SAP events and conferences

Achieve Balanced Reporting by Automating Document Splitting in the New G/L

By Mitresh Kundalia, Director - SAP Practice, Quality Systems & Software Inc.

See the rules, steps, transactions, and method for document splitting. Then follow seven steps to configure it in your system.

Key Concept
 The splitting method is the main key to activate document splitting in the new G/L, including splitting rules, business transactions, business transaction variants, and more. It is a component of active splitting. The process is a new capability in the new G/L, and was not possible in the classic G/L.

The new General Ledger (new G/L) in the SAP ERP system offers a feature called document splitting. With document splitting, the system splits accounting line items according to specific characteristics. This enables you to create financial statements for entities such as segments and meet the legal requirements such as International Accounting Standards (IAS) regulations for segment reporting. You can find out more information about these requirements by visiting www.iash.org.

This feature allows you to define pricing conditions that control the flow of documents from one document type to another. This feature is useful for managing the flow of documents from one document type to another.

I'll discuss the concepts of document splitting with a simple example of a financial transaction of a vendor invoice. Say you have a vendor invoice that has two expense items totaling \$10,000 with \$1,000 input tax, so the total is \$11,000 (Table 1).

If you are responsible for profit center PC-1 and want to analyze all of the financial transactions for PC-1, you cannot do so completely because the Vendor account (A/C) and Input Tax are not assigned to any profit centers. You cannot assign PC-1 or PC-2 because these items are for combined balances, not for individual profit center items.

Looking more closely at the financial document, it is clear that the total expenses of \$10,000 were in the ratio of 80%-20% between PC-1 and PC-2. Therefore, according to the same

Account Description	Amount	Profit Center
Vendor A/C	11,000	
Purchases 1	8,000	PC-1
Purchases 2	2,000	PC-2
Input Tax	1,000	

Table 1 Sample vendor invoice accounting entries

Accomplish Segment Reporting using Document Splitting in the New G/L

Mitresh Kundalia

QS&S Expertise – Case Studies

Sample projects & key initiatives

- New G/L Implementations
- New G/L Migrations
- System Migration - System Consolidation, Migration & Conversion
- Group Currency conversion
- CO-PA conversion
- Chart of Accounts Rationalization
- SAP Country Version, Regulatory and Compliance Requirements
- Maquiladora program, Tax Planning Program between US and Mexico
- Material Ledger Conversion
- CO-PA Overhaul - Significant Enhancements to CO-PA functionality & Dual CO-PA - Profitability Analysis: Costing-based & Account-based
- SAP System Design Review (SDR)

Customer Testimonials...

"QS&S understands our business well and the teammates speak our language. In fact, many times they have a better understanding of our requirements than we can articulate." - Vice President - Business Division, a leading manufacturing company

"We chose QS&S for our New G/L Migration project, because they were simply the best - most knowledgeable and most qualified." - IT Director, a leading media giant

"QS&S - a 'Non-typical' consulting firm, unlike many other 'typical' consulting companies. Very professional and always very thorough." - IT Director, a leading manufacturing company

"You are very deserving of the recognition due to the excellent work you do driven my strong relationships and in depth business and technical knowledge. I have so very much enjoyed working with you and your entire team. You are truly experts in your field and are held in highest regard with respect to professionalism and integrity. I wish you and your entire team the very best and sincerely hope our paths will cross again. Best wishes " - Business Director, a leading manufacturing company

"At a time when we are canceling the IT projects, we are pleased to award QS&S the CO-PA project because we believe the return on investments realized will far exceed the costs associated. QS&S team went above and beyond and delivered the value." - IT Director, a leading manufacturing company

"We like QS&S because they give honest opinions, which are in the best interest of the customer - unlike other consulting firms with smoke and mirrors." - IT Director, a leading multi-national giant

"Prior to hiring QS&S, we worked with two other consulting firms, but, they could not deliver. QS&S not only delivered as promised, but far exceeded our expectations." - IT Program Manager, a leading automobile company

New G/L Experience

Our New G/L Expertise

- **New G/L Expertise**
 - QS&S is one of the very few SAP consulting firms with New G/L expertise
- **New G/L Projects**
 - Multiple New G/L Migrations using Migration cockpits
 - Multiple New G/L Implementation projects
- **General Ledger Migration Optimizer (GLMO)**
 - Our proprietary product allows organizations to accelerate & jumpstart their SAP General Ledger (New G/L) initiatives
- **IFRS Changeover**
 - IFRS change-over Roadmap & Implementation
- **New G/L Publications**

New G/L Experience

New G/L book by SAP-Press

“Segment Reporting with Document splitting in the New G/L”

- **SAP Press, a premier publisher of the technical and strategic books for the SAP community, selects QS&S's detailed Guide-book on 'Achieve IFRS/IAS Segment Reporting in the New G/L' for publication**
 - New GL offers many new features including Document splitting to meet 'IAS-14 Segment Reporting' Requirements. With document splitting, the system splits accounting line items according to specific characteristics. This enables you to create financial statements for entities such as Segments. In this comprehensive guidebook on the document splitting, the author describes in detail on how to activate the document splitting automatically to create Segment reporting real-time. The book describes the background details on IFRS-8 requirements, the document splitting concept in the New G/L and step-by-step instructions to configure the New G/L to achieve balanced reporting.

Benefits

Phased approach recommended by SAP & Most effective execution of the project & Leading New G/L experts from industry

Effective Execution of New G/L project

...via cross-team collaboration

Our New G/L Team

■ Our New G/L Team

- Our New G/L team consists of experts for New G/L initiatives from all areas of Financials
- The “Thought” leadership consists of Ex-Platinum consultants and leading Financials experts in the industry
- [SAP-Press](#) publishes our book on New G/L Segment Reporting
- Managing many New G/L, CO-PA, Group Currency conversion & Financials projects
- Managing multiple [New G/L Implementation](#) projects
- Managing multiple [New G/L Migration](#) projects
- Multiple New G/L white-papers published in SAP Financials Expert (*published by SAP & WIS*)
- Many New G/L sessions presented at SAP conferences
- Proprietary SLO-type toolkits for GC conversion, Chart-of-Accounts (COA) extension and more

QS&S – New G/L Services Highlights

- ✓■ Phased methodology for managing New G/L projects with step-by-step guidance
- ✓■ Mature, revision-secure procedure to migrate and convert big amounts of data
- ✓■ Minimal system downtime
- ✓■ Migration and conversion of complete data sets
- ✓■ Little project effort needed because of extensive object libraries
- ✓■ Tools for the verification of system & data consistency
- ✓■ Self-developed SLO-type tools for the implementation of technical objects
- ✓■ Extensive analysis functions
- ✓■ Application package with predefined business objects
- ✓■ Library of accelerators – pre-configured applications
- ✓■ Best practices for migration and implementation projects

QS&S Group Currency Conversion Cockpit

QS&S IP

Group Currency (GC) Conversion cockpit, is QS&S's proprietary SLO toolset. It offers a phased methodology for managing the whole cycle of GC conversion with step-by-step guidance.

Activities	Activities	Activities	Activities	Activities
<ul style="list-style-type: none"> Plan for three full test conversions Prepare production conversion check list Involve business users in testing critical transactions Tune custom conversion toolset to client environment 	<ul style="list-style-type: none"> Determine downtime window Optimize production environment with Basis Clean up of production data where required Business users communication Validate system preparedness 	<ul style="list-style-type: none"> Finalize the conversion check-list Review exchange rates Reorg key data base tables Record account balances Lock users Optimize batch processes Determine the acceptance-criteria 	<ul style="list-style-type: none"> Change configuration for GC Lock users Stop batch jobs Back up system Run conversion programs Validate account balances Go/No-go decision 	<ul style="list-style-type: none"> Reset batch processes Open FI Posting periods GC Configuration Validate the acceptance criteria, including validating financials (BS & P&L) Unlock users

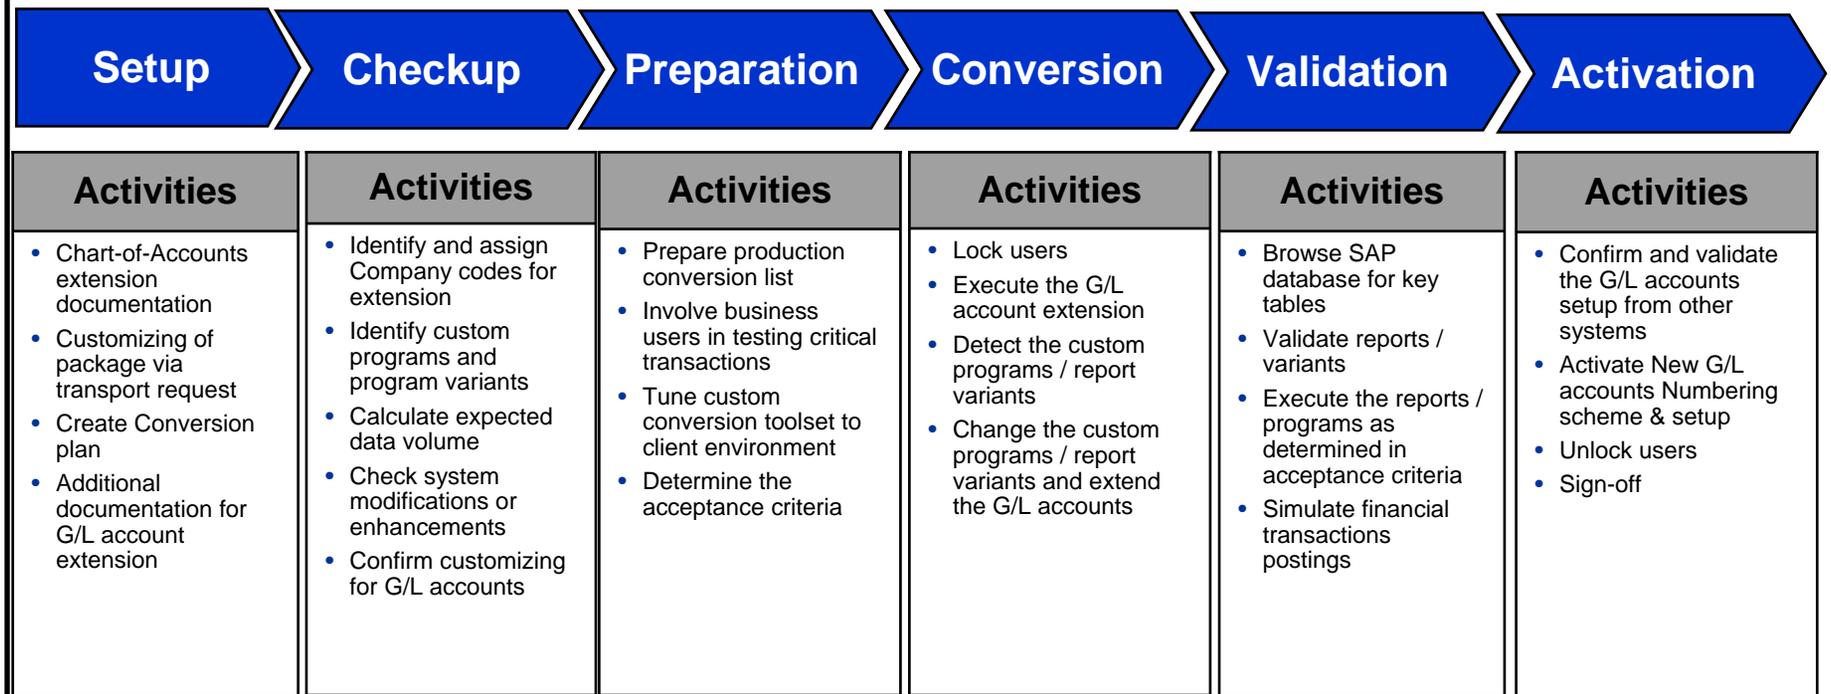

Benefits

- Controlled Process step by step
- Minimum system downtime
- Verification tools for system consistency
- Extensive object library

QS&S Chart-of-Accounts Extension Cockpit

QS&S IP

Chart-of-Accounts extension cockpit, is QS&S's proprietary SLO toolset. It offers a phased methodology for managing the whole cycle with step-by-step guidance.

Benefits

- Central location for documentation and status of conversion process
- Controlled Process step by step
- Documents and report postings allow for clear audit trail
- Conversion processing is controlled by sequence of project steps

About QS&S

Topics

- QS&S Overview
- Relevant Experience
- New G/L - Approach & Methodology
- General Ledger Migration Optimizer (GLMO)
- **IFRS Changeover – Approach & Methodology**

IFRS Changeover

IFRS implementation is not only a reporting project. There are significant impacts on the organization

- Organization
 - Company organization - both corporate and subsidiary levels
- Processes
 - Valuation of individual business transactions
- Systems
 - Transactional systems - may need software and hardware

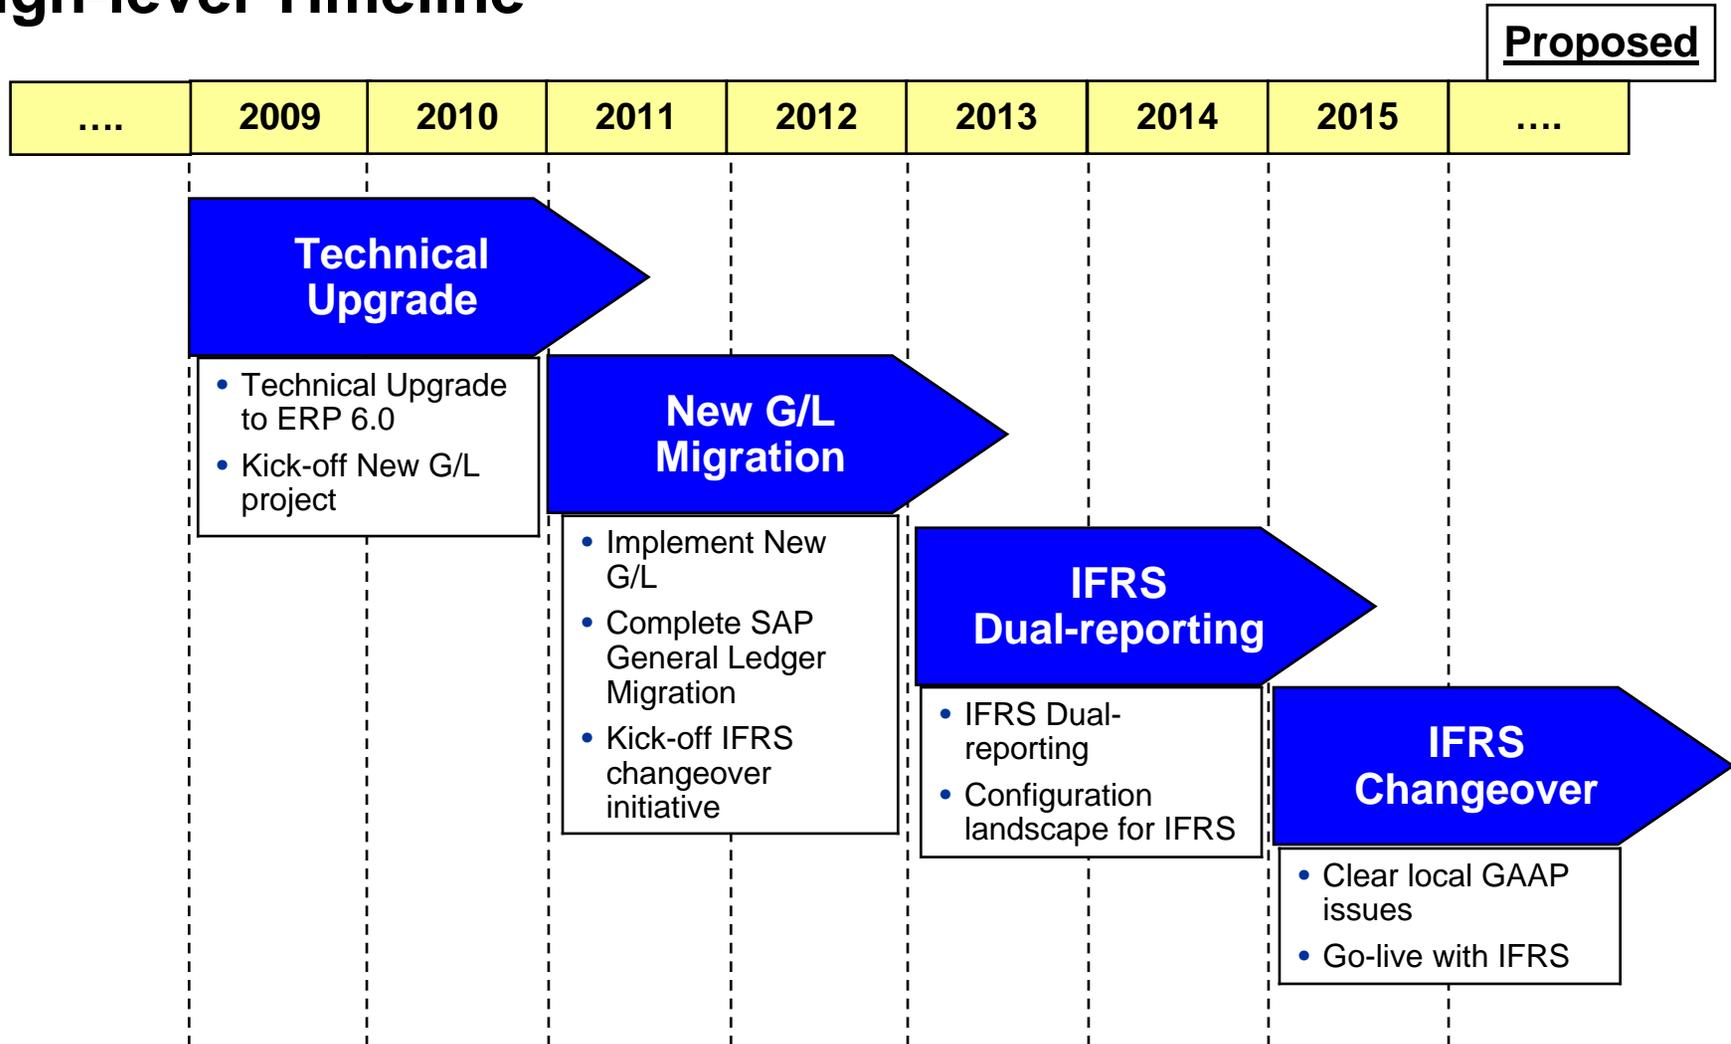

The IFRS “answer” will be specific to your company, industry, and country - “One size fits all” does not apply for IFRS.

IFRS Benefits

IFRS changeover has significant benefits

- Improved quality of reporting
 - A globally accepted set of principles-based standards may offer opportunities to consistently apply accounting standards
- Improved transparency and investor confidence
 - As use of IFRS becomes more widespread, the new standards will increase comparability for investment analysis and performance measurement
- Reduced accounting complexity
 - US GAAP accounting rules are viewed as complex and difficult to apply
 - IFRS is based on “principles” not rules which will provide the opportunity for more clear representation of financial results
- Potential process and cost efficiencies
 - The same financial reporting standards across the world will provide opportunities to simplify and centralize financial reporting processes and functions
- Cost of capital
 - A single global financial reporting standard will enhance the efficiency of capital allocation and should reduce the cost of capital
- Process and technology optimization
 - Converting to IFRS may provide an opportunity to improve and streamline key components of the current SAP landscapes
